### PROJECTS

#### Eventer | 2024

Event Management System

- Event Management System built using the MERN stack (MongoDB, Express.js, React, and Node.js). It provides a platform for users to publish, manage, and attend events. Admins can manage users, events, and other system settings.

#### Kottu-Labs | 2024 May - 2025 May

Restaurant Management System

- Kottu Labs is a modern restaurant platform combining exceptional dining experiences with innovative technology. It highlights the restaurant's story, values, and commitment to quality service, offering both dine-in and takeaway options for customers. The project is built using PHP for server-side development, JavaScript for client-side interactions, MySQL for database management, and HTML and CSS for structuring and styling the web pages. Git is used for version control and collaborative development.
